## Introduction - Aton Informatics

Aton Informatics is leading web solution provider of India. Aton Informatics is providing Internet Solutions since 2009. Presently we are serving around 1000 customer all over India. Aton Informatics client list include many government, semi government offices and corporates. Presently we are offering following services to our customer.

- Web Hosting
- Domain Registration
- Web Designing
- Bulk SMS Services
- MLM Portals
- E-commerce Solutions.
- Web Promotions
- SCO Services

Aton Informatics is known for delivering enterprise level solution at affordable price. We provide solutions unmatched by other competing companies and have established ourselves as a leader in the hosting industry. Our main strength lies on our heroic customer support. We always strive to give more than what is expected from us. Today Aton Informatics has become synonym of reliability in hosting industry and we achieved this level with dedication and hard work of our staff and our loyal customers who shown full faith on us when we started our business.

### Our Mission

Aton Informatics strives to constantly improve the quality of its service, develop its competitive power, preserve its loyal clients and strengthen its position in the market. Today our rates are most competitive in the market and sometime people become sceptical when they saw our rates. We understand that we need to be in profit in order to run our company and to give our customer quality service. We have designed our packages and rates after thorough research and taking in consideration all factors.

### Superior Datacentre

Our servers are located in the NAP Of the Americas, in Miami Florida. Nap of the Americas is one of the most impressive datacentres in the world. This datacentre uses a state-of-the-art environmental control system that regulates temperature and humidity levels throughout the facility. The server rooms are the heart of the facility. Here, bunker-style construction provides for non-stop operations and protection of your e-business infrastructure. The only entrance to the server rooms is through highly secured entryways, protected with palm scanners, Card-Key and keypad locks. State-of-the-art fire suppression & electric systems prevent any fire or power surges from disrupting server operations.

### Superior Network

Aton Development Services

HomeSearch11.com

The facility uses CISCO-only routers and switches setup for redundancy and reliability. We are connected by premium tier-1 carriers such as InterNAP which ensure 100% network reliability. This translates into faster downloads and better reliability for our customers.

### **Superior Hardware**

All our systems can tolerate at least 1 hard disk failure with no downtime. All our servers are backed up to secure NAS servers every 24 to 48 hours. This along with RAID ensures that your data is safer with us than on your hard disk! We use powerful internal CISCO routers and firewalls to maintain network security and protect our systems from harmful internet traffic.
