

ANTI DOCTOR & ANTI PEOPLE

CEA BILL

WRONG TIMING In corona crisis when govt should be supporting his frontline warriors by providing subsidies and peaceful and positive work environment ,govt is trying to enforce this bill to harass the medical fraternity by bringing Inspector RAJ

WRONG PURPOSE When medical field is already governed by PMC and 43 various acts , whats need for this draconian act OnLY Purpose seems to be satisfying false egos

WRONG INTENTIONS Govt till date has not been able to improve Public health care Sector Rather it is trying to Privatised legendary Rajindra Medical College Patiala What the govt intends to GAIN by controlling and regulating Private Sector which on its own is successfully providing 75% of health care services from last many years

WRONG RESULTS May be burecuratic advisors are no realising the ramifications of this bill , that it will increase the cost of medical treatment as owners have to invest more to upgrade or maintain the standards required under this ACT that will ultimately have to be passed upon to patient Genera! Public will have to face the music

WRONG MESSAGE On one hand Govt is increasing the fees of medical education and there seems to be no regulation on Private Medical colleges Fees structure (perhaps owned by politicians) And on another hand is demoralising the coming generations to adopt this noble profession by demeaning and nailing it by this act

Even a layman can sense the mess Govt is going to create Instead of following its Election Manifesto of regularizing Private hospitals and Clinics and to snub quackery, it is trying to demolish the Private healthcare System , only lifeline Available in this corona crisis with the false hope of transferring Buck of failure of tackling Corona onto medical fraternity.

General Public is advised to stand with Doctors to support our Protest against this Draconian Act for the betterment of Society , healthcare and future of our Coming generations of Both patients and Doctors
